Why is Mali launching a 200 MWp solar power plant?

Loading... Mali's President Assimi Goïta has launched a 200 MWp solar power plant project with NovaWind, a Rosatom subsidiary, to address the nation's electricity crisis and promote sustainable energy. The EUR200 million investment aims to supply 10% of Mali's electricity within 12 months.

Why is Mali building a new solar power plant?

As Mali grapples with an ongoing electricity crisis that hampers economic growth, transitional President Assimi Goïta laid the foundation stone for a new 200 MW photovoltaic solar power plant. The Russian company NovaWind, a subsidiary of Rosatom, is constructing the plant, marking a significant step in the country's energy sector.

How much is a solar power plant in Mali worth?

Solar panels. Author: John S. Quarterman. License: Creative Commons, Attribution 2.0 Generic. Construction of a 200-MW solar power plant in Mali was officially launched on Friday, Mali's national broadcaster ORTM reported. The project, worth over USD 200 million (EUR 184m), is a partnership between Mali and Russia.

Will a solar power plant supply 10% of Mali's electricity?

Once operational, the photovoltaic plant will be capable of supplying 10% of Mali's electricity. One day before the start of work on the Sanankoroba solar power plant, the Head of State of Mali, Assimi Goïta, met with the General Director of NovaWind, Grigory Nazarov, to review the progress of the project.

Which company is constructing a new energy plant in Mali?

The Russian company NovaWind, a subsidiary of Rosatom, is constructing the plant, marking a significant step in the country's energy sector. In recent weeks, Mali's transitional government has intensified efforts to implement this solution nationwide.

How much energy does Mali produce?

A May 2023 report by the United Nations Development Programme (UNDP) stated that in 2020, Mali had a production capacity of 1,024.92 MW, including 162 MW from self-producers - all thermal. Electricity production stood 2,577.44 GWh, comprising 69% thermal energy, 26.8% hydroelectricity, and 4.2% solar.

Adani Green Energy Limited (AGEL), step-down subsidiary, Adani Green Energy Twenty Five Limited, recently commissioned its 250 MW solar power project. This project is located at Badi Sid, District in Jodhpur, Rajasthan. With the commissioning of this plant, AGEL's total operational renewable generation capacity has increased to 11,434 MW.

The Malian government has approved the construction of a 93 MW solar photovoltaic power plant in Touna, in southern Mali. The EUR106 million solar facility will be built by UAE-based independent ...
