

What is AC distribution box & ACDB?

AC distribution box provides protection in Load AC side during failures. ACDB incorporates MCB and MCCB's etc. It has provision for surge protection also inside to ensure maximum protection to the sophisticated electronic equipment. Looking for specific info?

What is solar ACDB & AC distribution box?

Solar ACDB are an important part of SPV system to provide extra electric protection to the system during failures. AC distribution box provides protection in Load AC side during failures. ACDB incorporates MCB and MCCB's etc. It has provision for surge protection also inside to ensure maximum protection to the sophisticated electronic equipment.

What is the difference between solar DCDB box and solar ACDB box?

Solar DCDB box distributes the DC solar power to the solar inverter. Solar ACDB box distributes the AC power converted from solar power inverter to the grid or utility. We can use Fuse, mcb and spd as the main components for extra protection. They save the inverter and the solar power system from the external surges from the Grid or natural spikes.

What is an ACDB in a solar inverter?

The ACDB (Alternative Current Distribution Box) is a small solar device that is installed between the solar inverter and your home load. An ACDB includes necessary surge protection devices (SPD), AC fuse, and MCB to protect the appliances from any type of electrical damage or high voltages.

What is an ACDB & how does it work?

An ACDB includes necessary surge protection devices (SPD), AC fuse, and MCB to protect the appliances from any type of electrical damage or high voltages. It receives the AC power from the solar inverter and directs it to AC loads through the distribution board.
