Afghanistan hgm energy

How much biogas can Afghanistan produce a year?
Theoretically,Afghanistan has the potential to produce about 1,400 million cubic metersof biogas annually. A quarter of this amount could meet half of Afghanistan's energy needs,according to a January 2011 report from the United States National Renewable Energy Laboratory.

What type of electricity is used in Afghanistan?
The majority of electricity in Afghanistan is imported. The Naghlu Dam is one of the largest dams in Afghanistan,which provides some electricity to Kabul Province,Nangarhar Province and Kapisa Province. Energy in Afghanistan is provided by hydropowerfollowed by fossil fuel and solar power.

Does Afghanistan have geothermal energy?
Afghanistan has large amounts of lithium and uranium reserves. An area of vast untapped potential lies in the heat energy locked inside the earth in the form of magma or dry,hot rocks. Geothermal energy for electricity generation has been used worldwide for nearly 100 years.

How will electricity demand change in Afghanistan in 2032?
For the whole of Afghanistan,gross demand,i.e. dispatched electrical energy,will increasein the base case scenario by 5.7% or 8.7% per annum on average from its current level to 18,400 GWh in 2032. Total peak demand in 2032 is expected to stand at around 3500 MW.

How much electricity does Afghanistan import?
Afghanistan currently imports over 670 MWof electricity from neighboring Iran,Tajikistan,Turkmenistan and Uzbekistan. This costs Afghanistan between $250 and $280 million annually. Afghanistan's western provinces have long purchased electricity from eastern Iran.

How can geothermal resources be used in Afghanistan?
Prospects of low to medium temperature geothermal resources are widespread all over Afghanistan. To achieve the goal for providing power supplytowards whole Afghanistan,a large investment plan is required for all the sub-areas like,Generation expansion,Transmission Network development and strengthen Distribution System.
