

Alta power systems Slovenia

Who is Alta Power Corp?

Founded in 2001, Alta Power Corp has been outfitting customers worldwide with the highest quality innovative solutions at the greatest value possible. Our products offer flexibility, can be used in a variety of ways and have many unique applications.

How will Slovenia transition to low-carbon energy sources?

Slovenia is seeking to gradually transition to low-carbon energy sources by focusing on efficient energy consumption, increased use of renewable energy sources, and the development of active electricity-distribution networks. This strategy will likely envisage a strong reliance on nuclear energy and further development of hydroelectric power.

Why does Slovenia import power?

Slovenia increasingly imports power to meet growing domestic consumption in the face of flat domestic production and could face shortfalls in the near future, particularly in view of its limited financial resources and the long regulatory approval process required for new hydroelectric or nuclear capacity.

The transition to renewable and low-carbon energy systems is progressing slowly, which is partly a consequence of the intermittent and fluctuating nature of energy derived from renewable sources, such as sunlight and wind. The virtual power system addresses this issue by providing a cloud-based or on-site energy management system and intelligent flexibility trading platform ...
