For On-Grid solar PV systems, the sources of electricity are the grid e.g., Meralco, Batelco, etc., and the solar energy through the solar panels. Daytime power comes from the solar panels, nighttime or low sunlight situation power comes from the grid. It is by far the most common and widely used by homes and businesses.

Yesterday we were driving back from Pamiers and decided to take the back roads through the small towns in the area and we stumbled upon this solar farm. We had known that France derives some 85% of it's electicial energy from nuclear power generation, but we don't know where the other 15% comes from.
