

Angola guascor energy

Who is Guascor energy?

Guascor Energy is a global leading manufacturer & services provider of gas and diesel engines designed for power generation, cogeneration, waste conversion and marine use. For more than 50 years, the company has been supporting customers in the process of decarbonisation and decentralization of energy & power.

Does Angola have a 25% share of natural gas?

Angola Targets 25% Share of Gas in Energy Mix Angola strives to increase the share of natural gas in the energy mix to 25% by 2025, up from current levels of between 7%-10%. Both Angola's non-associated gas project and the Sanha Lean Gas Connection Project - developed by energy major Chevron - support this goal.

Why should you choose Guascor energy?

With a superb fuel flexibility and also with fuel blending availability, Guascor Energy products represent a cost-efficient choice in both implementation and service. Guascor Energy offers a complete range of propulsion, generation and auxiliary engines powered by diesel or by gas, to meet the demand of any type of professional marine application:

Does Angola have a gas project?

Both Angola's non-associated gas project and the Sanha Lean Gas Connection Project - developed by energy major Chevron - support this goal. The \$300 million Sanha project, set to come online this month, will deliver gas to the country's inaugural LNG facility: Angola LNG.

Are Guascor energy engines reliable?

The excellent quality, efficiency and reliability of Guascor Energy engines have been verified in marine and industrial applications for more than 50 years and more than 3,000 actively running engines & gen-sets worldwide by the end of 2022.

Is Angola ready for a natural gas pipeline in 2025?

Striving to boost natural gas production while maintaining crude output above one million barrels per day (bpd) beyond 2027, Angola has a strong project pipeline planned for 2025. Beyond oil and gas developments, the country seeks to diversify its energy matrix through investments in green hydrogen and renewable energy.
