

Angola phelan energy

What is energy in Angola?

Energy in Angola describes energy and electricity production, consumption and export from Angola. The energy policy of Angola reflects energy policy and the politics of Angola. Biomass accounts for 58% of the country's energy consumption; oil accounts for 35%, gas 4% and hydroelectric power 3%.

Who are the Phelan clan?

With Ireland's renowned early historic records, the Phelan Clan can be traced back to 108th King of Ireland Felim and his son Fiacha born in 148 AD. It is a heritage woven with resilience, innovation, and commitment to progress, and these Celtic warriors are lauded in written history, for their determination, to defend family, land and country.

Who is Kyran Phelan?

In 1884, Kyran Phelan, the grandfather of Paschal, founded a modern burgeoning family enterprise as a whiskey maker and selling under his own branding, marking the start of a legacy that has spanned various industries from retail to agriculture, hospitality to meat.

gas to the country's inaugural LNG facility: Angola LNG.

Phelan Green Hydrogen, a subsidiary of Phelan Green Energy, is a global leader in Green Hydrogen energy innovation with a focus on green ammonia, produced in the desert lands of South Africa, Egypt, Chile and Peru, with a 10 year target to produce 1m tons gH₂.

At Phelan Green Energy, Paschal Phelan firmly believes that the company's green energy strategy embodies a holistic vision that harnesses both solar and hydrogen technologies. Its approach leverages the sun's energy to split hydrogen molecules from water, capturing hydrogen as a base gas for carbon-free products like green ammonia.
