

Antigua and Barbuda cobblestone energy

How much does electricity cost in Antigua and Barbuda?

This profile provides a snapshot of the energy landscape of Antigua and Barbuda, an independent nation in the Leeward Islands in the eastern Caribbean Sea. Antigua and Barbuda's utility rates are approximately \$0.37 U.S. dollars (USD) per kilowatt-hour (kWh), which is above the Caribbean regional average of \$0.33 USD/kWh.

Will Antigua and Barbuda have a 100% renewable power system?

The current power system of Antigua and Barbuda was used to calibrate the model in HOMER, and subsequently various scenarios were considered to provide the Government with the least-cost pathway for a 100% renewable energy power system by 2030. The study has considered the following five main scenarios:

Will Antigua and Barbuda increase its share of renewables?

The current power system is widely dominated by fossil fuel generation, and with the plans in place as of 2020, the renewable share would merely increase to 9%. To significantly increase its share of renewables, Antigua and Barbuda should follow the pathway of the optimal system scenario outlined in the Roadmap.

Which energy source is most dominant in Antigua and Barbuda?

From the figure, it is also clear that the HOMER optimisation has estimated solar energy to be the more dominant source of electricity in Antigua and Barbuda to serve most of the load. The dominance of solar PV in meeting most of the total load in this scenario is clearer when observing the installed capacity by technology in Figure 21.

Is Antigua and Barbuda's power system dominated by fossil fuels?

The results of the optimisation performed for the current power system of Antigua and Barbuda have confirmed that today's power system is highly dominated by fossil fuels with merely 3.55% of the electricity share coming from renewables.

Who owns the power in Antigua & Barbuda?

Under the terms of the deal, the Antiguan government will retain a 51% share in WIOC.¹⁰ Antigua and Barbuda's generation resources are owned primarily by APUA, with the remainder owned by the sole independent power producer (IPP) currently in operation-- Antigua Power Company Limited (APC); other IPPs are allowed but none exist to date.

Antigua Public Utilities Authority (APUA) and the Barbuda Council are providing financial support for the government's plans to build a hybrid power plant (comprising solar, battery storage, and diesel energy sources).¹²

Antigua and Barbuda is a small dual-island nation in the Caribbean, the most northeastern of the Lesser Antilles [].Of the total population, 97% is on Antigua, although the islands are comparable in land area, with the island of Antigua having an area of 281km² and the island of Barbuda having an area of 161km² [].The tropical climate has very little variation ...

Antigua is Spanish for "ancient" and barbuda is Spanish for "bearded". [13] The island of Antigua was originally called Wadadli by the Arawaks and is locally known by that name today; the Caribs possibly called Barbuda Wa'omoni. Christopher Columbus, while sailing by in 1493, may have named it Santa Maria la Antigua, after an icon in the Spanish Seville Cathedral.
