

Why is Valencia a good place to invest in solar energy?

Thanks to the year-round sun in the region and the active private and public investment in renewable energies in Spain, Valencia is an ideal location for the development of solar renewable energy. It is rapidly becoming a hub for photovoltaic parks, plants, and solar energy initiatives.

What solar projects are being developed in Valencia?

Finally, various solar park and solar plant projects have been developed within the Valencian Community recently. One of the most notable, still in its planning stage, is the Acciona Valencia Solar PV Park, which will have a capacity of 86 megawatts (MW).

How has PV capacity changed in Valencia?

The PV capacity - essentially, solar panel capacity - of the Valencian region has increased significantly from its starting point of 313 gigawatts in 2011. Aside from government investment, private companies are also joining the solar revolution.

Are solar panels tax deductible in Valencia?

Residential buildings can receive tax deductions of up to 95 per cent in Valencia, with deductions of up to 50 per cent for mixed-use buildings in Alicante. Homeowners can request an income tax (IRPF) deduction by installing solar panels for home consumption.

How many solar plants are there in Valencia?

This capacity has increased with the investment of private companies like Iberdrola, which has funded three photovoltaic (PV) farms in the Valencian region to the tune of EUR235 million. Two of the solar plants are based in Valle de Ayora-Cofrentes, and the third is near Alicante, with all three providing up to 1,450 jobs in total.

Will solar power grow in Spain?

This exponential growth looks set to continue, as solar power in Spain becomes a greater source of energy. The Valencian Community is leading the way in renewable energy growth. In 2020, more than 70 per cent of electricity generation in the region was carbon-free, demonstrating a wholehearted commitment to sustainable energy development.
