Picture of hydro power plant "Gepatschspeicher" with a power of 395 MW in Tyrol, Austria. The use of hydropower in Austria has a long tradition. At the beginning of the 20th century, ...

It is the ideal product for supplying power to places that do not have access to the power grid, and also for reducing energy consumption (and CO2 emissions) by switching from conventional power sources.

Taiyo Green Energy was established in December 2014 to operate the Taiyo Group's solar power business. In addition to the Ranzan Floating Solar Power Plant, we have begun cultivating vegetables at a plant factory as a way to help address the issue of food production.

Harnessing the collective and considerable strength of our partners, Taiyo Power & Storage is committed to creating quality-driven renewable energy projects.

Solar panels and energy management systems currently have a life cycle of up to 20 or 30 years. A battery that remains efficient after more cycles will better match the lifespan of the solar power system as a whole.

TGE installs photovoltaic systems of any type and size, from small domestic installations, to systems for the self-production of energy in commercial and industrial use, to large ground power plants for the sale of energy to the grid.

We are a leading manufacturer and exporter of power products. We have well-equipped factories in China and Vietnam, which are spread across 400 acres of land. We have invested over \$100 million in our facilities, which allows us to produce high-quality products.
