

How do I choose the right automated storage solution?

Limited space,an awkward warehouse building,increasing inventory or turnover in unusual shapes or sizes can all make it difficult to find the right ASRS solution. Multiple factors need to be considered when choosing the right solution. Automated storage solutions need to be scalable while maximizing space and performance.

Why should you choose Lista automated guided vehicle systems?

With LISTA automated guided vehicle systems,you can make the most of these advantages. You receive a fully integrated system solution to automate your internal material flow: safe,flexible and optimally matched to our storage and workspace equipment.

When did ATEX sign a contract for a fully automated storage system?

On 22.04.24,the contract for a highly compact,fully automated storage system was signed in a festive ceremony. Interview with Michael Huser,Executive Vice President Software &Services Business Unit Solutions Visit us from June 10 to 14,2024 in hall 11.0,stand A69 and find out more about our intralogistics solutions for the ATEX area

How has Acino Pharma AG increased storage capacity?

To increase storage capacity,Acino Pharma AG has invested in future-oriented plant modernization,including expansion. Our customer day in Bad Pyrmont including a site visit to the Lenze Mechatronic Competence Campus. On 22.04.24,the contract for a highly compact,fully automated storage system was signed in a festive ceremony.

What are the advantages of automated guided vehicle systems?

Automated guided vehicle systems with automatically controlled vehicles are also increasingly prevalent in intralogistics. The advantages are obvious: automated material flows increase efficiency, reduce the error rate and thereby help to save time and costs. With LISTA automated guided vehicle systems, you can make the most of these advantages.

What is a scalable autostore robotic cube system?

The scalable AutoStore robotic cube system helps to manage changing order fulfillment demands. The Kardex Miniload-in-a-Box is ideal,when product availability and delivery speed are driving factors. Find out how Bridgestone,the world's largest tire maker,guarantees 100% pallet readability in the production environment.

Craftsman Storage offers a wide range of customized solutions for storage and retrieval needs. From shelving and racking to lifts and automated storage systems, they provide efficient and prompt logistics solutions with reduced floor footprint and manpower. 15. viastore GROUP. Website: viastore ; Headquarters: Stuttgart, Baden-W&#252;rttemberg ...

ROI within two years typical for stand-alone AutoStore projects.; Achieve more from the same workforce, thanks to improved productivity and working conditions.; Consistently higher quality and faster, higher throughput from robotized storage and order processing system; SynQ AutoStore or SAP EWM software, developed in-house by Swisslog, embeds intelligence in the ...

Automated Storage and Retrieval Systems (AS/RS) are at the forefront of this transformation, offering solutions that address the unique challenges of cold storage environments, such as maintaining consistent temperatures and managing the complexities of pallet handling.

Hamilton Storage delivers top of the line automated sample management. Our sample storage solutions are designed to fit your laboratory needs without sacrificing sample integrity. Check out how Hamilton Storage can fulfill your sample management and sample storage needs. ... Hamilton Storage GmbH - Domat/Ems, Switzerland. Hamilton Storage GmbH ...

An automated pallet warehouse is a software-controlled system that replaces manual storage and retrieval processes with automated ones. Picking takes place according to the goods-to-person principle. The automated pallet warehouse transports the required items to workstations.. The core components of an automated pallet warehouse and the driver of its high performance are ...

Comprehensive automated modular storage system. With more than 90 years of intralogistics experience and over 1,000 successfully installed automation solutions worldwide, we now offer you a tried-and-tested, demand-oriented modular storage system that can be scaled as required.

Automated storage & retrieval systems for warehouse efficiency and quality. Traditional and advanced ASRS for miniloads, cartons and pallets. ... We strive to give you complete confidence, ensuring you get the right solutions and the ...

Swisslog's automated warehouse solutions are transforming the food supply chain, addressing challenges from production to point of sale for manufacturers, distributors, and retailers worldwide.

To optimize small parts logistics, Kardex is implementing a highly efficient AutoStore solution for SABAG Luzern AG at their headquarters in Rothenburg (Switzerland). In the future, the AutoStore system will be used to ...

With Technology Centers in Austria and Sweden, Swisslog leads the way in storage and shuttle technologies handling our own production and applying our years of experience, we promise to deliver high quality automated logistics solutions to our customers.. With its storage shuttle systems, Swisslog offers its intelligent warehouse management software SynQ - packed with ...

You receive a fully integrated system solution to automate your internal material flow: safe, flexible and optimally matched to our storage and workspace equipment. Benefit from performance and expertise from a single source. ...

Swisslog is a global company with Swiss roots. Learn more about our company's facts, figures, history, management, locations and sustainability. ... Our automated warehouse solutions are perfectly customized to your needs and ...

This automated radio shuttle and high-density solution is ideal for palletised loads in many different storage applications. The size and shape of this ASRS system is flexible with heights up to 12 metres and loads up to 1.5 tonne, and the number of shuttle units and AGFs (automated guided forklifts) can be adapted to suit the

demands of the operation.

At their core, automated storage and retrieval systems, or ASRS for short, are computer-controlled inventory management systems that automate the storage and retrieval of unit loads for picking, packing, and shipping. Solutions can range from miniload or shuttle systems to pallet shuttle to vertical lift modules.

Whether a storage container is loaded with just a single item or thousands of very small parts depends solely on the individual requirements. For easier handling, the interior of the storage bins can be further customized with lengthwise and crosswise dividers. With a uniform footprint, three types of containers are available in different heights.
