

Azure energy Taiwan

Who is Azure energy?

Azure Energy Pte. Ltd. utilizes a unique business model that empowers us to provide our clients with class-leading bespoke solutions to their thermal coal procurement requirements. Strategically located in the heart of Southeast Asia, we are ideally positioned to service the rapidly growing markets of neighbouring nations.

Are Microsoft datacenters in Taiwan sustainable?

For Microsoft datacenters located in Taiwan we have included local sustainability investments and datapoints in support of meeting and exceeding our commitments around carbon, water, waste, and ecosystems. We've committed to have 100% renewable energy coverage globally by 2025.

Will Microsoft Build an Azure Data Center in Taiwan?

Microsoft Corp yesterday announced that it would build an Azure data center in Taiwan, and create a new team focused on the research and development of artificial intelligence (AI) hardware.

What is Microsoft doing in Taiwan?

In Taiwan, our datacenters will be designed for our backup generators to be powered by a renewable biofuel that reduces net carbon emissions. Our facilities use indirect evaporative with fluid coolers. Globally, Microsoft reuses or recycles 90%+ of end-of-life assets.

Are Microsoft cloud services more energy efficient than traditional datacenters?

Research shows that Microsoft Cloud services can be up to 93 percent more energy efficient than traditional enterprise datacenters. We're committed to providing a sustainable Microsoft Cloud, so we wanted to share information about how we take responsibility for our datacenter operations.

Why is Microsoft Taiwan partnering with Build School?

Through a joint project with Build School, Microsoft Taiwan is supporting free admission to a five-month professional training course in Microsoft Azure front-end and back-end development platform technology. The program targets students with autism to support a diverse workforce in Taiwan's technology industry.
