If your Solar system generates more power than consumed, your power bill will be negative, and you will get energy credits for when your home appliances consume more than the Solar system produces. Note that the generation will be relatively low in the winter months, but will get higher as we approach the summer solstice.

Polaron, an energy company, removes all barriers associated with solar energy adoption by introducing its distinct energy financing option. With an enduring tenure in the Canadian market, it offers all-inclusive, cost-effective packages that include the design, financial planning, installation, and professional maintenance of solar systems.
