1 · The Swiss government is providing Ukraine with a new winter aid package worth 45 million Swiss francs (48 million euros). The funds will be used for the restoration of energy infrastructure damaged by Russian shelling, repairs to homes, and addressing humanitarian needs, according to the Federal Council of the Swiss government.

Energy & Environmental Science, 2019. Hydrogen technologies have experienced cycles of excessive expectations followed by disillusion. Nonetheless, a growing body of evidence suggests these technologies form ...

The financial markets hope that the Ukraine conflict will soon be replaced by "business as usual". They appear to have got used to the war, as it has not escalated any further to date. Nevertheless, the current state of the conflict, which could last for an extended period, is set to keep inflation historically high. What does it mean for corporate profits and the global economy?

Baumann's energy audits follow the structured approach of ASHRAE Standard 211-2018 for identifying and analyzing potential measures, economics, and implementation of energy efficiency projects in existing facilities. Our energy audits are meant to inspire and enable action and provide a custom plan for implementation.

More than a year has now passed since Russia launched its attack on Ukraine and triggered a war with global consequences. But what have been the demonstrable consequences of this war and what impact has the conflict had? Even though the origins of the war can be traced back to 2015 and, depending on how you look at it, even beyond, it has only been during the past 12 ...
