

How much power does Bhutan have?

Bhutan's installed power generation capacity is approximately 1.6 gigawatts(GW). Over 99 percent of the country's installed capacity comes from hydropower plants,accounting for 1,614 megawatts (MW) of the country's total capacity of 1,623 MW in 2018. More than 99.97 percent of households have access to electricity.

Who owns Bhutan Power Corporation & Druk Green?

Both the Bhutan Power Corporation and Druk Green are owned by Druk Holding and Investments,which exercises oversight in the investment and development activities of the energy companies. Both companies faced decreased profit margins largely because of losses due to increased energy price on repurchase from India.

What are the new government agencies in Bhutan?

In 2002, reforms in the executive body, the Lhengye Zhungtshog, produced three new agencies under the Ministry of Economic Affairs: the Department of Energy, its subsidiary Bhutan Electricity Authority, and the Bhutan Power Corporation.

What is the main energy source in Bhutan?

On-grid hydropoweris the country's main energy source. Bhutan operates four major hydroelectric facilities,several small and mini hydroelectric generators,and has a handful of further sites in development. Many of the small and mini hydropower plants in Bhutan serve remote villages that remain disconnected from the power grid.

Will Bhutan's Clean Power Project help India's transition to renewables?

While the clean power from the project will help meet Bhutan's increasing electricity requirements,it will also complement and contribute to India's energy transition to renewables. The partnership involves a 40% equity investment by Tata Power in the Public Private Partnership Company,Khorlochhu Hydro Power Limited.

Who regulates the energy sector in Bhutan?

While the Department of Energy formulates policy,planning,and coordination,the Bhutan Electricity Authorityis the main regulatory agency of the energy sector. Since 2006,the Electricity Authority has had the ability to impose differential tariff structures on low,medium,and high voltage consumers.
