Can solar power grow in Bhutan?

"We did the studies on renewable energy management master planning in 2016 and the reports say Bhutan has a capacity for 12 Giga watts of solar energy and 760 MW of wind so we have a lot to tap as there is a lot of opportunity for solar energy solar power to grow in Bhutan. There is a lot of potential and I think this is the right step."

Is Bhutan a fossil fuel country?

He also mentioned that Bhutan generates all our electricity from renewables, yet it hides a paradox, - almost 78% of our energy consumption is fossil fuel because our transportation system is totally dependent on fossil fuel and cooking & heating needs are still mostly powered by fossil fuel.
