Now I have a 280ah-48v battery bank, Daly 16s-250a BMS, about tired of messing with it & want something better. Planning for the future off-grid setup; (4) 280ah-48v battery banks. I'm looking at OverKill but not sure the 16s-100a BMS is big enough.

The two most important things to me are 1) safety and 2) integration with my Victron products. This will be a 16s, 48v (although it's not a strict design requirement) LiFePO4 battery with low-moderate current requirements (probably something like a 3000 watt inverter). Thanks for any input!
