What is a DIY solar panel kit? A do-it-yourself solar panel kit is a complete set of parts that you need to install a solar power system in your home. They usually include inverters (string or micro-inverters). Also, racking, wires, surge protectors, a combiner box, labels, wiring diagrams, and instructions.

DIY solar systems have the same limitations as a system installed by a contractor, but by choosing a DIY solar installation you also may be limited by your own skill and/or comfort level. Installing a solar system requires you to be comfortable with basic construction tasks, electrical wiring, and navigating permitting and utility
