In August 2015, Cochin International switched to running on solar power alone, thanks to the more than 46,000 panels installed over a six-month period at a cost of \$6.27m. The 12MW plant provides more energy than the site needs, saving some for inclement conditions and night-time operations, while also supporting the state's grid.

Redarc solar panels are tested to handle rain and hail. The portable panels can also be tied or pegged down so as not to lose them in windy conditions. Generally though, when the weather is stormy, rainy or there is hail about, sunlight levels are not high enough to generate power from your solar panels.

TGWC has already built several other sustainable energy projects in the region, including the new solar parks in Saba. The solar park in Bonaire will consist of an impressive 10,816 solar panels that will be ...

The solar facility is comprised of 3,650 high-efficiency mono-crystalline panels supplied by Yingli Solar. Power generated by the facility will be directly fed to the stadium until the completion of the World Cup, meeting about 30% of the stadium's power needs. Power will be supplied to about 6,000 local households after events.
