

Who is the leader in management software in Brazil?

According to FGV, TOTVS is the market leader in management software in Brazil. The company has invested R\$2 billion in R&D over the last five years to meet its clients' demands. TOTVS has over 50% market share in Brazil, and is among the top 3 players in Latin America, having clients in over 40 countries.

Are renewables cost effective in Brazilian isolated systems?

Diesel is the main source for electricity generation in Brazilian isolated systems. Many studies suggest that renewables are already cost effective in these systems. Six public policies are proposed to promote renewables in isolated systems. An MCDM model (AHP-fuzzy-TOPSIS) is developed to evaluate the policies.

How does Brazil's energy system affect the environment?

As discussed, the majority of isolated systems in Brazil are located inside the Amazon forest and the electricity generation on these places is mostly based on burning fossil fuel, leading not only to greenhouse gas emissions and pollution in a sensitive area, but also to expensive costs.

How many power plants are there in Brazil?

Nowadays in Brazil, there are about 250 isolated systems, concentrated in the Northern region, which sums only 1% of the electricity total consumption of the country, but represents around 40% of the territory. Most of these systems are supplied by diesel power plants, with a few examples of generation by natural gas, biomass or small-hydro.
