For a 5kW solar system, you need approximately 12 solar panels if each panel produces 415W. To calculate the exact number of panels, use the formula: 5,000W (5kW) divided by the wattage of each panel. For instance, $5,000W \div 415W = 12.04$ panels. If the calculation doesn't result in a whole number, simply round up or down to get the final count.
