

Who is Cenovus Energy?

FotografiaBasica/E+via Getty Images Background The Canadian oil and gas producer Cenovus Energy (NYSE:CVE), hereon referred to as "Cenovus", is no stranger to controversy given the majority of their production comes from oil sands that often attract negative attention from environmental groups.

How much oil will Cenovus Energy produce next year?

Cenovus Energy guides for total upstream production of between 770,000 and 810,000 barrels of oil equivalent per day (boepd) next year, with production from oil sands and thermal projects expected at between 590,000 and 610,000 barrels per day (bpd), which reflects a turnaround at Christina Lake in the third quarter of 2024.
