

EASUN Power is a team that is constantly committed to promoting green energy to the world. We provide the latest technology. We provide first-class after-sales service for any customer issues.

The agreement announced by the company last week included a commitment to develop up to 300 MW of solar capacity plus a battery system to power the oil project and nearby towns of Moundou and...

Leading sub-sectors in renewable energy include solar power and electricity generation and distribution. Chad's location in the Sahel, which features brilliant sunshine especially during the dry season, and lack of alternate fuel sources such as coal make solar power an attractive export and investment sector.

The N'Djamena Amea Solar Power Station is a planned 120 MW (160,000 hp) solar power plant in Chad. This renewable energy infrastructure project will be developed by Amea Power, an independent power producer (IPP), based in Dubai, United Arab Emirates .

A 40MW project that is in line to become Chad's first independent power producer-built solar project has been granted US\$780,000 from the Sustainable Energy Fund for Africa (SEFA).

Chad has launched an auction calling for a consulting engineer to control and supervise the build of a 30 MW (AC) solar power plant - with a 60 MWh storage system, 90 kV line and 90/33 kV ...

In this unfavourable context, the French renewable energy firm InnoVent is developing Chad's first solar power plant in Abéché. The pilot phase of the plant (1 MW) was built between mid-2020 and November 2021, with soldiers providing security for both personnel and equipment.

EASUN POWER's LiFePO4 batteries are highly efficient and reliable. Made with Lithium Iron Phosphate, they outshine other types in safety and longevity. Equipped with a top-tier Battery Management System, they provide optimized performance across a variety of applications.

This project will construct an initial 36MWp solar PV plant in Djermaya, 30km north of Chad's capital, N'Djamena. Development of Djermaya Solar will be phased to gradually integrate renewable power into Chad's national grid.
