Lead-Acid Battery in Qatar 2024 . Lead-Acid batteries have been a prominent technology for decades, serving as a reliable source of power in various applications, including automotive, renewable energy storage, and backup power systems. The fluctuations in the prices of these batteries can have far-reaching implications on industries, consumers, and the overall ...

The winter will obviously be different - I won't have enough solar to run the house or charge the batteries much. I guess in the winter I can get maybe 1/2 a days electricity from charged battery/solar (if I can charge the battery overnight sensibly) so would need to buy 6 to 8kWhr per day. In the height of summer I wouldn't need to buy ...

At night I'm buying it back from the utility for 6.8 but paying fees and bogus taxes and whatnot making the buy-back about 18 cents. Rather than sell my solar cheap and buy it back expensive at night, I'd rather just keep what I make in a battery and use it at night. I have a Solar Edge inverter if that makes a difference.

I would suggest saving up and getting quality components. Cheap electrical is always a bad idea, especially with very high amperage (battery) systems. I went through 3 different "cheap" solar charge controllers before I just bought a Victron. One cheap one failed within a month, another let out magic smoke, and the third just sucked.
