

Chile novali energy

What is a Novali battery?

novali's high voltage lithium-metal batteries provide breakthrough performance in charging speed, range, sustainability and cost efficiency. novali engineers and builds customized battery systems for mobility and stationary storage applications Let's share some energy!

How do I contact Novali energy?

Contact us Vaartdijk 22,3150 Tildonk,Belgium +32 472 693 854 info@novali.energy Contact us Name Email Address Phone number Company Message Thank you! Your message has been send. Oops! Something went wrong while submitting the form. Our office Vaartdijk 223250 TildonkBelgium Contact info info@novali.energy +32 472 693 854 Cutting edge cell technology

Why are Novali battery cells better than solid-state batteries?

In addition, our cells offer enhanced safety and sustainability characteristics. When compared to solid-state batteries, novali battery cells out-compete on charging speed and cost.

How can public-private partnerships accelerate Chile's energy transition?

Public-private partnerships have been key in accelerating Chile's energy transition, especially when it comes to the country's green hydrogen market. Green hydrogen, a clean energy source that splits water into hydrogen and oxygen using renewable electricity, sits at the heart of Chile's energy transition.

How has Chile accelerated its energy transition?

Despite its historic ties to fossil fuels and copper mining, Chile in recent years has accelerated its energy transition through broad-based political support, private-public partnerships and innovative green technologies.

Will Chile replace coal plants with solar thermal plants?

As coal plants are eliminated, Chile intends to replace them with solar thermal plants or convert them into batteries like the Alba Project. The solar thermal tower Cerro Dominador has become a symbol of Chile's energy revolution against climate change.

Chile's National Lithium Strategy. The current government, acknowledging lithium's critical role in the global energy transition, launched the National Lithium Strategy on April 20, 2023. Its goals include sustainable ...

The company's battery systems are modular, scalable and used in electric vehicles, stationary storage and off-grid power units, enabling businesses and governments to transition to a cleaner energy future.

Novali specializes in next-generation battery technology within the energy sector. The company offers high-performance, sustainable battery cells and custom storage systems designed to enhance charging speed

and energy efficiency.

4 · Cargo vessel CHIPOL GUANGAN carrying BYD batteries for Grenergy arrives in Chile. Image source: Grenergy Renovables (handout) A shipment of 105 battery containers, totalling 0.6 GWh of storage capacity, has arrived at the port of Iquique from China, Grenergy said ...

Chile has set an ambitious goal of converting 70% of its total energy consumption to renewables by 2030 and pledged to become carbon neutral by 2050. The country's energy transition strategy has evolved in recent years due to a combination of broad-based political support and innovative green technologies.

Chile's National Lithium Strategy. The current government, acknowledging lithium's critical role in the global energy transition, launched the National Lithium Strategy on April 20, 2023. Its goals include sustainable exploration and extraction, social and environmental responsibility, technological and value chain development, and involvement from public and ...
