

Christmas Island energy savings companies

How can PRL group lead Christmas Island towards a sustainable future?

Our ambition is to help lead Christmas Island towards a sustainable future based on renewable energy. PRL Group have committed towards rooftop solar for all its owned properties on the island, and the design and development of a large-scale solar energy system for Christmas Island.

Why did we install solar & battery storage systems on Christmas Island?

Christmas Island - home to the greatest migration of red crabs in the world, and an island that is almost all national park. We installed solar and battery storage systems at two sites on Christmas Island for Parks Australia to provide clean power to their main headquarters and research field station.

What does PRL group do for Christmas Island?

PRL Group is committed to building a more diverse and sustainable economy for Christmas Island. We are developing a number of projects in areas such as tourism, renewable energy and fresh food production.

What can Christmas Island do for tourism?

The study includes a detailed assessment of the natural assets of Christmas Island and will assess the potential tourism opportunities suitable for remote island tourism development in the region. The work will produce a range of potential tourism offerings for the island including eco, agricultural and adventure tourism.

Yes, Christmas Island does have electricity. The island has a power station that generates electricity for the residents and businesses on the island. The electricity is provided by the Christmas Island Electricity Company, which is responsible for ...

Vivant is a smart home control company and one of the most recognizable energy saving companies in the US. They offer software (the best example is their app), and other solutions for both home automation and remote control. The company focuses on smart energy use, reduced energy consumption, and creating streamlined systems that can be applied ...

Electrical contractor, civil contractor, surveying, Cocos Keeling Islands. Renewable energy, solar, battery storage, power and electrical, microgrids. Cocos (Keeling) Islands, Christmas Island, ...

The energy company spent ad money explaining the issue and alerting their customers. The State Dept. of Public Utilities held hearings on the matter and did its best to alert consumers. We get it, it's annoying, lots of people literally can't afford it.
