The president of El Salvador's transmission company Etesal, Edwin Nú#241;ez, announced plans to install energy storage systems at substations managed by the company. This initiative, mandated by President Nayib Bukele, aims to address energy fluctuations, particularly in solar power, which can destabilize the distribution network.

"The design of the ClearPower Industrial Turbine Generator has been focused on achieving a simple and robust construction where a governing design trade-off has been to favor simplicity over peak efficiency. By this approach ClearPower has the potential of opening up for hydropower installations in sites previously not financially viable."
