

What is the solar energy potential in Colombia?

The potential of solar energy at a global level in Colombia is 4.5 kW h/m²/day and the area with an optimal solar resource is the Peninsula de la Guajira, with 6 kW h/m²/day of radiation, surpassing the world average of 3.9 kW h/m²/day. In the referenced link, there is an interactive map of the radiation indices in Colombia by IDEAM.

Can solar energy boost energy supply in Colombia?

In this sense, Serrano (2017b) carried out in Colombia an analysis of the use of solar energy for the future of the country as part of the general concern for the increase in the emission of polluting gases into the atmosphere and that it can boost energy supply through renewable sources.

Will solar and wind power increase in Colombia in 2022?

Colombia has world-class wind and solar energy potential and recent regulatory updates have enacted a robust framework of incentives. However, as of 2022, solar and wind have an operating installed capacity of just about 1.5% of the capacity mix. The next five years could see a sharp increase in solar and wind capacity.

How can wind and solar energy be used in Colombia?

The expected large deployment of wind and solar resources in Colombia can be used to leverage creation of local employment, gender equality and benefits to local communities and Indigenous peoples. This will require strengthened policy frameworks to avoid negative effects on these areas.

Is solar energy a problem in Colombia?

Taking into account that Colombia is mostly a desert area, what was presented above confirms the deficit of photovoltaic development in the ZNIs, that underutilize the solar resource and the great territorial extension.

Future picture of the solar energy

Is Colombia a good alternative to solar power?

Despite this, Colombia has a uniform solar radiation potential throughout the year, calculated at 4.5 kWh/m², making it a potential alternative for generating electricity through photovoltaic systems.

Coastal Renewables is a leading Sussex Solar company based in Worthing, near Brighton. We have been installing quality gas heating systems in Sussex and surrounding area for the past 30 years. We moved in to the renewable energy sector to supply quality and highly efficient solar hot water heating systems, and now air and ground source heat pumps to ...
