

Cold electric Tunisia

Who is cold electric?

We are Cold Electric, a smart battery company. We reduce energy waste to almost zero, creating dynamic opportunities in a clean-energy future. Our batteries create decentralised, self-sufficient living. The days when millions of people's electricity needs were met by a handful of large coal, nuclear and gas-fired power stations are waning.

What drives Tunisia's energy transition?

Three key drivers will dictate Tunisia's energy transition: energy security, given Tunisia's growing energy balance deficit; economics, given the relative decrease in the price of renewables; and environment, given the Country's commitment to reduce domestic greenhouse gas emissions.

Why does Tunisia need more electricity?

As one of the most climate-vulnerable Mediterranean countries, Tunisia's electrical system is expecting increased demand resulting from expanding peak-hour demand patterns, intensifying cooling needs stemming from greater warm spells, and increasing desalination needs.

Who produces the most electricity in Tunisia?

While STEG controls the vast majority (91.7%) of installed generating capacity and generates 84% of the country's electricity, there is one independent power producer, Carthage Power Company, operating in Tunisia. Carthage Power Company owns and operates a 471-MW combined cycle power plant.

What does Cold Electric do?

Cold Electric is committed to collaborating with customers and partners to drive innovation and development in energy technology. We look forward to working together with various stakeholders to achieve the goal of sustainable energy and contribute to creating a better living environment for the future.

What is a cold electric battery?

Cold Electric batteries allow users to store the wasted energy from the peak & off-peak fluctuations, so cities don't waste energy on transportation and don't need to spend money on expensive power plants. Which battery is right for you? The Sport Utility Battery (SUB) is compact and ideal for homes.
