

What is the infrastructure like in Comoros?

Comoros has limited infrastructure for inter-island transportation. Only one official maritime operator is available for passenger and cargo services. This ship sails only once a week and can carry a maximum of 200 passengers.

Does Comoros have a developed tourism industry?

The Comoros tourism industry is still developing, despite having numerous natural resources for tourism such as its beaches and marine environment. It does not have as strong a tourist industry as its regional competitors Réunion, Mauritius and Seychelles.

What is the energy situation in the Comoros?

The energy situation in the Comoros is substantially based on fossil fuel imports. This archipelago's socioeconomic development is heavily dependent on energy security from sustainability, availability, and affordability perspectives.

Where can I find more information about Comoros?

For more information about Comoros, consult the Comoros Page and other Department of State publications and other sources listed at the end of this fact sheet. The United States established diplomatic relations with Comoros in 1977, following its 1975 independence from France.

Why is Comoros a poor country?

Agriculture, including fishing, hunting, and forestry, is the leading sector of the economy. It contributes 40% to GDP, employs 80% of the labor force, and provides most of the exports. The country is not self-sufficient in food production; rice, the main staple, accounts for the bulk of imports. The Comoros is one of the world's poorest countries.

The cost of electricity in the country is the highest in Africa at US \$ 0.30/kWh. This is due to a sector dominated by diesel generators. The national electricity company SONELEC also faces some financial problems caused by technical losses underpinned by obsolete infrastructure and inappropriate structuring of distribution networks.
