Classic power packs are well-suited to critical plating applications. These packs are lightweight and portable, and manual dials allow the voltage to be changed quickly. SIFCO ASC also offers a range of advanced power packs, including lightweight models ranging from 15 volts to 500 volts, depending on the application.

The bodies used in the HY05 range of power packs are designed and manufactured internally and are divided into three types: H0C for single and/or double effect circuits; H0R reversible for double effect circuits; The valve mounting cavities are machined according to the SAE standard 8 or 16 UNF, while the connecting doors are threaded 1/4" BSP.

The valve mounting cavities are machined according to the SAE standard 8 or 16 UNF, while the connecting doors are threaded 1/4" BSP. On request, threads are available in 3/8" and in SAE/NPT format.. One-way pumps can be used with G. 0 or G. 1 from 0.25 cc/rev to 9.8 cc/rev, both standard and helical gears up to a maximum pressure of 350 bar.

SIFCO ASC has created a solution to improve quality, flexibility and safety in the selective plating process. The new power pack line, TechnoPlate[®], which has been developed in collaboration with German-based Plating Electronics (PE), ...
