

Complete solar panel Georgia

How much do solar panels cost in Georgia?

Solar panels will save you a lot of money over time, but the upfront costs aren't cheap. The average Georgia homeowner needs a 11.89 kW solar panel system to cover their electricity needs, which comes out to \$31,693 before incentives. Prices range from \$26,939 to \$36,447, but after the federal tax credit, that drops by 30%.

Is Georgia a good state to install solar panels?

With higher than average electricity prices and abundant sunshine, Georgia's a pretty great state for solar energy. It may not have the best local solar incentives, but as a Georgian, you can still take advantage of solar's most valuable incentive, the Federal Tax Credit. Here's what you should know about installing solar panels in the Peach State.

Does Georgia Power offer solar?

From home installation and our buy back program, to non-installation options, our goal is to make solar an option for every Georgia Power customer. Learn more about our behind-the-meter solar programs, including the new Renewable and Nonrenewable Resources (RNR) program, and how to interconnect your system.

Is Georgia a solar-friendly state?

Georgia is one of the solar-friendliest states in the nation, with an average of 218 sunny days each year. This ample access to sunlight allows Georgia to make the most of solar energy production throughout the state. Georgia currently ranks 9th in the U.S. for solar energy production.

Does Georgia pay taxes on solar installation?

The cost of installing renewable energy systems in Georgia, including solar, is supported by the federal solar investment tax credit. This tax credit amounts to 30% of the value of the solar system and is claimed on your taxes in the year following installation.

How much do solar panels cost?

The cost of solar panels in Georgia is currently lower than the average price of \$3.00 per watt across the United States for residential solar power systems. The size of a solar panel system affects the installation cost, with larger installations having a lower cost per watt due to 'bulk pricing'.

Average solar panel costs in Georgia typically range between \$9,555 and \$27,300. The size of your solar panel system is a big factor in your total cost. It also depends on what incentives you're ...

Solar panels are typically designed to have a 20- to 30-year lifespan -- although some can produce power for much longer than that. Damage from the elements can sometimes shorten this lifespan, and asset owners may find that they greatly improve their facility's output by repowering before a panel has reached its end-of-life.
