

# Cook Islands solstice energy

Does the Cook Islands have solar power?

The Cook Islands Electricity Sector historically been powered by diesel generators. Since around 2011, increasing solar PV generation on Rarotonga has changed this situation. And in 2014- 15, installation of 95-100% renewable solar hybrid systems on the Northern Group Islands further altered the mix.

How will new energy technologies affect the Cook Islands?

In future, new energy technologies such as marine energy may offer new opportunities for the Cook Islands to generate electricity from other renewable sources. Developments in energy storage or in energy efficiency may also further reduce the Cook Islands' reliance on diesel. The Cook Islands prefers to use proven and economic energy technologies.

What changes will the Cook Islands make?

The changes will include management of power utilities, environmentally friendly and cost effective renewable electricity sources, and energy efficient strategies. The Cook Islands will be careful in its selection of renewable electricity options and will not entertain unproven or non-commercial technologies.

Will the Cook Islands use renewable electricity?

The Cook Islands will be careful in its selection of renewable electricity options and will not entertain unproven or non-commercial technologies. The attached Summary Table provides some indicative and preliminary information on the types and costs of the renewable electricity technologies we are considering.

Why is energy important in the Cook Islands?

Energy is a fundamental prerequisite to the sustainable socio-economic development of a nation. As such, the Cook Islands Government considers that environmental protection, energy security and economic growth are inseparable key pillars of our country's development.

Can a partner help the Cook Islands achieve its targets?

The Cook Islands is looking for partners who can help achieve its targets through funding the conversion of one or more of the islands from diesel generation to renewable energy. We acknowledge the support we have already received from our partners.

W; Energy; Cook Islands Energy; Cook Islands Energy. See also: Cook Islands Electricity Energy Consumption in the Cook Islands. the Cook Islands consumed 1,677,278,000 BTU (0.00 quadrillion BTU) of energy in 2017. This represents 0.00% of global energy consumption. The Cook Islands produced 55,300,000 BTU (0.00 quadrillion BTU) of energy, covering 3% of its ...
