Cook Islands ultra low humidity dry cabinet

With McDry"s full product line of dry cabinets and boxes now available through Hisco (awarded Top Distributor for McDry Sales in 2017) you will: Get reliable and cost-efficient, low-humidity storage for your moisture-sensitive devices; Prevent micro-cracking, popcorning and delamination during the reflow process; Eliminate the need for nitrogen

<5%RH Ultra Low Humidity Fast Dry Cabinet, 1% to 5% RH(Automatic), fast recovery time.With or without nitrogen purging function, comply with J-STD-033C standard.CE certified.

Ultra-low relative humidity dry cabinets (RH) storage for Moisture Sensitive Devices: Electronic Components, Optics, Cameras and Laboratory. Totally self-contained, nitrogen (N2) unnecessary! Use Dry Cabinets for :

McDry dry boxes, dry cabinets and desiccators provide optimal ultra-low humidity and moisture-proof storage for IC packages. Moisture-sensitive components when safely and properly stored in McDry have an indefinite floor-life and micro-cracking or pop ...

ULTRA-LOW HUMIDITY STORAGE CABINETS 1%RH Prevent your components from micro-cracking during refl ow with proper Ultra-Low Humidity Storage. Micro-cracking (Popcorn Crack) Conforms to IPC/JEDEC J-STD-033D and IPC-1601 Guidelines. ? ESD safe design adheres to IEC-61340-5-1 (ESD) Standard. ? Dehumidifi es ICs to prevent

NetDry newly-developed design greatly increases dehumidifying system which runs faster and more reliable by comparing with those traditional dry cabinets. it can decrease the defective rate at production line. All NetDry manufactured dry cabinets comply with J-STD-033B standard.

An Ultra Low Humidity Dry Cabinet is a specialized storage unit designed to maintain an extremely low humidity level, typically below 10% relative humidity (RH). This level of humidity control is ideal for preserving a wide range of sensitive items, including electronics, photography equipment, optical instruments, and more.

McDry Dry Storage Cabinets maintain ultra-low humidity levels under the recommended indefinite safe floor life guideline of dry storage at 5% RH or less. For storing moisture-sensitive components and materials in the McDry cabinet, the oor life of the parts during the SMT assembly process. Simply place the MSL parts in

The Dr Storage X2M-157 Ultra Low Humidity Dry Cabinet is an advanced storage solution designed to protect moisture-sensitive items from humidity-related damage in ultra-low humidity environments. This dry

cabinet creates a precisely controlled atmosphere with extremely low humidity levels, safeguarding stored materials such as electronic ...

McDry dry cabinet for MSL components and desiccators provide optimal ultra-low humidity and moisture-proof storage for IC packages. Moisture-sensitive components when safely and properly stored in McDry have an indefinite floor-life and micro-cracking or pop-corning during the reflow process is not an issue.
