

# DR Congo lumcloon energy limited

What does Lumcloon energy do?

Lumcloon Energy identified flexibility as a key component to address the changing needs of the evolving power systems, which are transitioning from fossil-based generation to renewable-based generation. Lumcloon Energy is an expert in early-stage project development, particularly in Ireland where our landmark projects are based.

Why did Nigel join Lumcloon energy?

Nigel brought together a team with complementary skills and experience who work together to realise his vision. Lumcloon Energy identified flexibility as a key component to address the changing needs of the evolving power systems, which are transitioning from fossil-based generation to renewable-based generation.

When will Lumcloon energise?

It is on track to become operational in Q1 2021, with Shannonbridge to follow soon after, the spokesperson added. The energisation of Lumcloon follows Statkraft completing its 11MW Kerry battery storage project in Ireland in January 2020, lauding it as the first utility-scale battery storage project in the country.

Will Lumcloon energise the derry carney 110kV substation?

A Lumcloon Energy spokesperson told Solar Power Portal that the two companies are progressing the delivery of both projects and that Lumcloon is "pleased to announce the energisation of the Derry carney 110kV substation where the Lumcloon BESS will deliver its fast response capability".

This stored energy can be harnessed to mitigate frequency variations and enhance grid stability. Furthermore, the Battery Energy Storage System is equipped to store surplus renewable energy and release it as needed. This dual technology approach aims to enhance the dependability of renewable energy sources.

Who is Lumcloon Energy. Lumcloon Energy Limited is a consortium of two Irish Companies; RR Projects and Terotech International Limited. RR Projects (Managing Director, Nigel Reams), was founded in Ireland in 2003. It is a full service mechanical engineering company that provides services for power generation, resource recovery, cogeneration and construction worldwide.
