Since the middle of the last decade, Estonia has become increasingly linked to the Western European electricity system. In 2006, the EstLink 1 direct current interconnection between Estonia and Finland was completed, making it the first interconnection for Estonia and the Baltic states with Scandinavia.

Estonia's electricity sector is interconnected with regional energy markets, particularly through connections with Finland, Latvia, and Russia. The direct electrical interconnection with Finland was established in 2006 and was further strengthened by the Estlink 2 interconnector in 2014. Estonia joined the Nord Pool Spot market by 2012, securing its own price area within this regional electricity market.

Deltron is American leading global brand in power systems and renewable energy solutions market manufacturing facilities in Houston-Texas, Hong Kong, Turkey, and Israel. Over the years, have partnered with leading system integrators companies in global power and energy market to provide customers with high-quality products including multiple ...

Estonia has secured a position in the top 10 of developed economies for effective energy transition, according to Energy Transition Index (ETI) by World Economic Forum.

Evecon, an Estonian renewable energy company, and Corsica Sole, a French company, will build two battery energy storage systems with a total capacity of 200 megawatts in Harju County by 2025. The battery parks will be located in Kiisa in Saku Rural Municipality and Arukylä; in Raasiku Rural Municipality, correspondingly.

Estonia has initiated construction of what will be the largest battery park in Europe that will significantly contribute to the synchronization of the Baltic power grids with Europe by 2025: this project of Evecon, Corsica Sole and Mirova will enhance the energy security and will boost renewables in Estonia.
