

What are powersafe SBS batteries?

Manufactured to the highest international standards, PowerSafe SBS batteries offer outstanding performance in both float and cyclic applications. The high energy density of these batteries makes them ideal for system upgrades or reduced installation footprint, while still delivering dependable backup protection.

What is a powersafe V battery?

With proven compliance to the most rigorous international standards, PowerSafe V batteries are recognised worldwide as a premium solution for Telecom applications. The reputation of PowerSafe V batteries for long service life, together with excellent high rate performance, also makes it ideal for high integrity, high specification UPS systems.

Where are powersafe batteries marketed?

PowerSafe products are marketed under the SuperSafe brand in the following specific countries - India, Indonesia, Malaysia, Singapore, Thailand, Australia and New Zealand. Featuring advanced Thin Plate Pure Lead (TPPL) technology, PowerSafe SBS batteries deliver long life, high energy density and superior shelf life for telecommunications.

What is a powersafe OPzV battery?

The PowerSafe OPzV range of valve regulated lead-acid batteries uses a proven combination of gel and tubular technologies to offer a very high level of reliability. These single cells benefit from an optimised plate design that gives capacities in excess of DIN standard values.

What is a powersafe HB30 battery?

PowerSafe SBS batteries are designed for use in cabinets or on stands, close to the point of use. A separate battery room is not required. SBS HB30 battery is fitted with a 533mm/21 inch harness that terminates in a 2-pin polarised plug-in connector, which is compatible with embedded power SLC systems.

What makes powersafe EC-M batteries so rugged?

Extra thick positive grids make the EA-M series one of the industry's most rugged battery. PowerSafe EC-M batteries with calcium alloy plates offer maximized performance in long discharge applications and reduced watering requirements. EC-M batteries are supplied with 100% "out of the box" initial capacity.
