

While Dominica has made significant progress in diversifying its energy mix and investing in renewable energy projects, there are still challenges to overcome. The high upfront costs of renewable energy technologies, limited access to financing, and the need for capacity building and technical expertise are some of the barriers that the country ...

The Government is committed to make Dominica the first climate-resilient nation by 2030 and is working to create favourable conditions for future sustainable investments in renewable energies. As the island most advanced in geothermal explorations, Dominica is already a leader in renewable energy in the Caribbean.

Working with you, we're improving lives by delivering greener, smarter energy solutions the world needs. Driving change on a global scale. So everyone can take part in the evolution of energy.

EMS Ltd. stands out in Dominica as an enterprising firm dedicated to pioneering energy management solutions. Since its inception in 2013, the company has focused on energy, engineering, and consultancy services, with an emphasis ...

We live out our values when we actively strengthen the daily delivery of electricity to the National Power System with accident-free operations. The safety and security of our people and neighboring communities is our first priority that informs ...

The SREP evaluates various generation solutions to meet Dominica's future electricity needs, including geothermal, hydro, solar, wind, and battery storage. In April 2018, Dominica signed an agreement with the Clinton Climate Initiative (CCI) - an initiative of the Clinton Foundation - to manage S-REP.

The SREP evaluates various generation solutions to meet Dominica's future electricity needs, including geothermal, hydro, solar, wind, and battery storage. In April 2018, Dominica signed an agreement with the Clinton ...

Dominica, in the eastern Caribbean, is planning to join these pioneers and become the first small island developing State (SIDS) to stop using fossil fuels for energy generation. It's called...

We live out our values when we actively strengthen the daily delivery of electricity to the National Power System with accident-free operations. The safety and security of our people and neighboring communities is our first priority that ...

Morris walked participants through a detailed presentation on exploring the: Role of energy services, the energy services supply chain, energy flows in Dominica, losses in the provision of energy and the objectives

Dominica safe energy solutions

of the policy among other critical areas.

In an era where the transition to sustainable energy is imperative, Dominica is making significant strides in refining its regulatory landscape to enable a thriving energy sector. This advancement is propelled by a key partnership between USAID -through the Energy Sector Reform Project- and Dominica's Independent Regulatory Commission.

We help you develop and scale your renewable energy supply faster with solar, wind and energy storage to maximize the impact of your sustainability and business goals. 24/7 carbon-free energy

EMS Ltd. stands out in Dominica as an enterprising firm dedicated to pioneering energy management solutions. Since its inception in 2013, the company has focused on energy, engineering, and consultancy services, with an emphasis on promoting renewable energy and energy-saving strategies in Dominica and across the Caribbean.
