What is Iraq's solar energy strategy?

Iraq's solar energy strategy should be based on attracting foreign direct investmentswith strong commitment to diversifying its energy mix and to become energy independent bolstered by its willingness to collaborate with international array of local and foreign partners. Iraq's path forward is not,however,free of potential pitfalls.

Do solar panels adorn homes in Iraq?

In the mountains of Iraqi Kurdistan,solar panels adorn most homes,part of a small but growing effort to harness the sun's energy in Iraq. (AFP) The tranquil silence of Hazar Merd is striking in a country where the roar of large neighborhood generators used to provide back-up power is ever-present.

Does Iraq need solar power?

Although it receives a third of its energy needs from neighboring Iran, there are still daily power cuts, which worsen in the hot summer months when temperatures approach 50 degrees Celsius (120 Fahrenheit). In the mountains of Iraqi Kurdistan, solar panels adorn most homes, part of a small but growing effort to harness the sun's energy in Iraq.

How is Iraq promoting solar energy in 2021?

In 2021,Baghdad signed an agreement with the Emirati company Masdar to build five solar plantswith a combined capacity of 1,000 MW. To encourage renewable energy,Iraq's Central Bank in 2022 announced the allocation of $750 million in almost zero-interest loans for individuals and private companies adopting solar power.

How many solar power sites are there in Iraq?

In July 2019, Iraq's Ministry of Electricity invited independent power producers to participate in developing seven PV solar power sites with a combined capacity of 755 megawatts (MW) in the range between 30 MW to 300 MW. Many local and foreign developers saw the announcement as a move forward in an attempt to diversify the country's energy mix.

Is the Sun a good source of energy for Iraq?

An important day for Iraq in its journey towards green energy. One of the essential tools Iraq has in its fight against climate change is the infinite potentialof the sun as a source of energy.
