

Drax group company South Africa

Who is Drax Group?

Drax Group is a renewable energy company engaged in renewable power generation, the production of sustainable biomass and the sale of renewable electricity to businesses. Drax operates a generation portfolio of sustainable biomass, hydro-electric and pumped hydro storage assets across four sites in England and Scotland.

Why is Drax a global business?

It transforms Drax into a truly international business, trading bioenergy from the North America continent to Europe and Asia, and positions the enlarged Group to take advantage of global growth opportunities, with the market for biomass pellets for renewable generation in Europe and Asia expected to grow significantly.

What is Drax Industries?

Drax Industries is an aerospace firm known for manufacturing the Moonraker space shuttles for NASA. It first appears in the 1979 film Moonraker, where the villain, Hugo Drax, uses the company to further his scheme of wiping out the majority of humanity and replacing it with a new master race of 'perfect' human specimens.

Is Drax Group a carbon negative business?

Explore a comprehensive guide to our business model and investor relations. Drax Group's ambition is to become a carbon negative business by 2030, through innovative greenhouse gas removal technology. Drax CEO, Will Gardiner, outlines how carbon removals technology can support energy security while tackling climate change.

Who owns Drax Power Station?

In 1990, the electricity industry of England and Wales was privatised under the Electricity Act 1989. Three generating companies and 12 regional electricity companies were created. As a result of privatisation, Drax Power Station came under the ownership of National Power, one of the newly formed generating companies.

Is Drax a real company in the James Bond universe?

Although primarily an aerospace company in the James Bond universe, Drax is a real company that also owns a number of subsidiaries worldwide, producing and transporting individual equipment components. It appears in the 1979 James Bond film, Moonraker, and was later re-imagined for the 2012 video game, 007 Legends.
