Who is the distributor of electricity in Croatia?

Under the 2004 Energy law, customers in Croatia are allowed to choose their preferred distributor of electricity. However, HEP Operator distribucijskog sustava or HEP-ODS (a Hrvatska elektroprivreda subsidiary) remains the largest distributor to both industry and households.

How can Croatia become energy-independent and sustainable?

In order to become energy-independent and sustainable, Croatia counts on its abundant renewable energy resources. In February 2020, the Croatian government adopted a new Energy Strategy for the period until 2030, with an outlook through 2050.

How much energy does Croatia import?

In 2020 the country imported 53.6 per cent of its total primary energy supply, close to an EU average of 57.5 per cent. Croatia produces oil and gas but unlike most of its Western Balkan neighbours, it no longer has its own coal reserves. Croatia is somewhat dependent on electricity imports, depending on hydrological conditions.

How much electricity does Croatia produce in 2022?

The total production of electricity in the Republic of Croatia in 2022 was 14,220.5 GWh, whereby 63.7 percent (9,064.9 GWh) was produced from renewable energy sources, including large hydropower plants.

Croatia has four major hydroelectric plants in two main areas of the country -- the area near the Slovenian-Hungarian border and the area along the Adriatic coastline. The Varazdin hydro ...

A recent European Commission assessment of the country's draft climate and energy plan found Croatia falling short on energy efficiency and renewables.
