The Kaitaia solar farm was New Zealand's largest solar farm when completed and the first utility scale solar farm to supply the national grid. The 32MW solar plant has 61,000 solar panels and supplies electricity directly to a Top Energy substation, where it will help power the local mill.

Solar potential of New Zealand Solar panels on a home in Auckland. Solar power in New Zealand is increasing in capacity, in part due to price supports created through the emissions trading scheme. As of the end of April 2024, New Zealand has 420 MW of grid-connected photovoltaic (PV) solar power installed, of which 146 MW (35%) was installed in the last 12 months. [1]

Utility or grid-scale solar farms are set to play a key role in the electrification of New Zealand's economy. Although few farms are currently operating, grid-scale solar accounts for approximately half of the new generation interest in Transpower's pipeline and makes up the largest share of advanced projects.

So, to tap the high solar irradiation in New Zealand, and no issue of congestion, a joint project was launched by the UK solar company Hive Energy, and the developer Solar South West. This project, which is named the ...

This report presents comprehensive information on, and analysis of, New Zealand's energy supply and demand for the 2023 calendar year. ... 2023 saw the commissioning of the Kohira solar farm in Kaitaia, the first utility-scale solar farm in New Zealand. Geothermal generation was down by 3.4 per cent (275 GWh) to 7,758 GWh. Contributing to
