

What is the energy access problem in Mali?

Mali faces a critical energy access challenge. The national power access rate was 50% in 2019 (compared to 36.11% in 2015). The problem is particularly acute in rural areas with 21.12% access rate in 2019 (compared to 15.75% in 2015).

What is Mali's energy mix?

In 2019, Mali's energy mix was dominated by biofuels and wastes (65%) and oil products (32%), with coal and hydro accounting for the rest. In 2020, less than 5% of the population had access to clean cooking and 52% had access to electricity.

What is the power access rate in Mali?

The national power access rate was 50% in 2019 (compared to 36.11% in 2015). The problem is particularly acute in rural areas with 21.12% access rate in 2019 (compared to 15.75% in 2015). Power generation is limited (Annex A.17), forcing Energie du Mali (EDM, the power utility) to have recourse to frequent load shedding.

Will Mali achieve universal access to electricity by 2030?

For clean cooking, Mali targets universal access by 2030. In recent years, the rate of access to electricity in Mali has surpassed 25%, thanks to a public focus on mini-grid solutions. The government of Mali now plans to increase hybridisation of its mini-grids by adding PV capacity to diesel power plants.

What is the energy strategy of Mali?

The general energy strategy of Mali focuses on the development of local resources such as hydropower and solar energy in order to reduce petroleum imports. Objectives of the National Energy Policy regarding renewable energy are: Promotion of RE.

Why is Mali a partner of power Africa?

Mali is a partner of Power Africa, a market-driven, U.S. government-led public-private partnership (PPP) aiming to double access to electricity in sub-Saharan Africa. It offers tools and resources to private sector entities to facilitate doing business in sub-Saharan Africa's power sector.

Malian energy policy aims at contributing to a sustainable development of the country by making energy services available to as many as possible, thereby favouring (promotion of) social-economic activities. There are four specific ...

The new Energy Gateway transmission line segments are intended to: (a) address customer load growth; (b) improve system reliability; (c) reduce transmission system constraints; (d) provide access to diverse generation ...
