

Energy power solutions Palestine

What is the Palestinian energy strategy?

Accordingly, the Palestinian Energy Strategy is to generate 50% of power locally from gas-fired power plants, import 40% from neighboring countries, and generate 10% from renewable energy sources. By 2026, the plan states that 200 MW of electricity will be generated from solar energy (utility-scale solar PV farms and rooftop solar PV panels).

How can Qudra help bridge the energy gap in Palestine?

By expanding solar access, Qudra is helping bridge this energy gap, enabling communities to thrive and industries to grow. Operating in Palestine presents unique challenges, particularly in securing financing and dealing with the political complexities that often disrupt the region's economic stability.

How much does it cost to build a power plant in Gaza?

Implementation of the first phase will involve a pilot project at a total cost of \$344 million in the North of the West Bank. The two power plants will cover 50% of the demand for electricity in the West Bank. Construction has yet to begin. More than a decade ago, a natural gas field named Gaza Marine was discovered off the shore of Gaza.
