

Is Yemen an energy importer?

Yemen is not a net energy importer, but it has the lowest level of electricity connection in the Middle East, with only 40% of the population having access to electricity. Rural areas are particularly badly affected.

What is the energy situation in Yemen?

Energy in Yemen refers to the energy and electricity production, consumption, and import in Yemen. Yemen is a net energy exporter. The primary energy use in Yemen was 87 TWh in 2008 and 88 TWh in 2009, which equates to 4 TWh per million people.

What is Yildirim energy doing in Turkey?

YILDIRIM Energy has ambitious plans to produce new solar power plants and build wind and geothermal power projects across its markets for the next 5 years, while aiming at reaching 3GW energy production capacity by 2030 and becoming the leading electricity producer with a renewable energy portfolio in Turkey.

1 · Israel said Thursday it struck ports and energy infrastructure used by Houthi rebels in Yemen after intercepting a missile fired from the country, warning Houthi leaders it "will reach you too." Houthi media said the strikes hit power stations, oil facilities and a port in Hodeidah, killing nine people and injuring others. The strikes came after the interception of a missile fired by ...
