

Energy voltus Georgia

What does voltus do?

As a leading virtual power plant operator, Voltus connects distributed energy resources (DERs) to electricity markets delivering less expensive, more reliable, and more sustainable electricity to the grid and more cash to our commercial, industrial, residential, and transportation customers.

How much money does voltus make a year?

Voltus pays thousands of commercial, industrial, and residential energy users to reduce or shift energy use. Find revenue and savings opportunities across demand response, demand charge avoidance, and other programs. Energy users in CAISO can earn up to \$180,000/MW-year. Voltus offers 6 cash generating opportunities in this area.

How many cash generating opportunities does voltus offer?

Voltus offers 6 cash generating opportunities in this area. Energy users in NYISO can earn up to \$400,000/MW-year. Voltus offers 7 cash generating opportunities in this area. Energy users in ISO-NE can earn up to \$420,000/MW-year. Voltus offers 4 cash generating opportunities in this area.

What's going on with voltus?

Voltus, a startup founded in June 2016 by former EnerNOC executive Gregg Dixon, has been getting a bit of buzz over the past few months. This week, the company unveiled what it's been doing to earn that buzz -- putting together a portfolio of 400 megawatts of demand response across North America's grid markets.

Is voltus a good aggregator?

GTM Research Analyst Elta Kolo noted that Voltus is "breaking ground in a market that has been sought after by aggregators for years. Not only was the demand response provider able to secure capacity in MISO, but it has done so with a unique aggregation mix.

Does voltus have a behind-the-meter-generation portfolio?

Voltus procured no behind-the-meter-generation; rather, the portfolio comprises demand response from commercial and industrial load, a good portion of which is capacity from very small commercial customers. This is a segment that remains largely untapped by aggregators."

Energy users get paid by grid operators, utilities, to conserve or shift electricity use in response to grid signals. These signals can be triggered by 1) a lack of energy supply (from heat waves, ...
