Sole S.A. was the first Greek company to be involved in the renewable energy sources sector, since its foundation in 1974. ... Energy XPRT is a global marketplace with solutions and suppliers for the energy sector, with product catalogs, articles ...

The mission of kpp energy & waste solutions. Our world is facing three challenges in terms of climate, waste processing and energy needs. On the one hand, we want to curb the climate impact of our energy use, but on the other hand, the global demand for energy is increasing due to a growing world population and increasing economic activity. ...

In Greece, biofuel production from plant residues presents a valuable opportunity for sustainable energy production, which is supported by national waste-to-energy policies

Reducing wasted energy is good for the environment and good for the bottom line. There are many ways to reduce wasted energy, but what they all have in common is that they will cut your utility bills and your greenhouse gas emissions at the same time. For example, reducing energy waste in manufacturing and improving production line efficiency is essential if manufacturers ...

HighLift(TM) heat pumps . We offer HighLift TM heat pump technology from Olvondo Technology AS, which we can integrate into your operations to provide steam or hot water from recovered waste heat throughout your plant. The technology is therefore well suited to applications with steam needs, such as direct UHT. The HighLift technology is based on a reversed Stirling ...

Regulating the Energy, Waste and Water sectors in Greece. According to the new Law 5037/2023, RAE acquired two new competencies, waste and water, thus renamed as RAAEY. In accordance with Article 5 of Law 4001/2011, the Energy, Waste and Water Regulatory Authority (RAAEY) is established as an independent regulatory body based in Athens.

Municipal solid waste is one of the most critical environmental pressures in urban areas, but can also be considered as a significant energy source (Amer and Daim, 2011, Moya et al., 2017). This pressure is triggered by the constant population growth, as well as by the consuming habits and behavioral patterns that dynamically change globally (Alfaia et al., 2017, ...

Stengler E (2006) Developments and perspectives for energy recovery from waste in Europe. Proceedings Venice 2006: biomass and waste to energy symposium, November 29-December 1, Venice, Italy. Google Scholar Themelis N (2003) An overview of the global waste-to-energy industry. Waste Management World 2003-2004 Review pp 40-47

The Challenge: In Greece, the country's waste management situation is a major structural problem. Greece landfills the majority of its municipal waste 81%, compared to 31% for the EU-28 average), with only 16% being recycled (EU-28: 27%) and 4% composted (EU-28: 15%), the EU Commission stated in an Environmental Implementation Review on Greece in February 2017.
