

Eritrea advanced power solutions

What is Eritrea's Nationally Determined Contribution (NDC)?

From fossil fuels to renewables Eritrea's Nationally Determined Contribution (NDC) identifies a shift from fossil fuel-based energy generation to electricity generation mixes using renewable sources and reducing transmission and distribution losses. It also encourages environmentally sound technologies to reduce greenhouse gas emissions.

How much electricity does Eritrea have?

It is also working towards raising the share of electricity generation from renewable energy. According to the 2019 World Bank Global Electrification Database, 50.3 per cent of Eritreans have access to electricity, with electrification reaching 75.6 per cent and 36.6 per cent of the urban and rural population, respectively.

Why is energy transition important in Eritrea?

Consequently, Eritrea's energy transition should be informed by multidimensional pathways that respond to diverse realities and are critical to sustaining implementation and adaptability. The world is at the tipping point for bolder steps and immediate aggressive actions.

Who is Advanced Power Solutions?

Advanced Power Solutions (APS) is a leading producer of premium quality batteries, with production site located in Poland: Gniezno. Our mission is to provide easy, safe, and sustainable mobile energy solutions. We aim to create a powerhouse of brands that improve consumers' daily lives, all while ensuring environmentally responsible production.

Where is Eritrea's first solar plant?

The government of Eritrea has received a \$49.92 million grant from the African Development Bank to fund a 30 MW photovoltaic plant in the town of Dekemhare, 40 km southeast of the capital Asmara. It will be the country's first large-scale solar plant.

Can Eritrea lead the way to a sustainable future?

The world is at the tipping point for bolder steps and immediate aggressive actions. Eritrea, a country with negligible emission contribution, can potentially lead the way to secure a safe and sustainable future by taking a different path from previous development trajectories.
