

What is the SSI ESG standard?

The SSI ESG Standard uses key criteria to enhance supply chain sustainability, instilling confidence in solar manufacturing practices and setting the bar for ESG performance in the solar sector.

Is solar a good investment for ESG?

Livestock grazing next to a solar project from Galp in Spain. Galp Energy's ESG is now at the centre of many investor requirements when it comes to finalising deals, and while solar is obviously a destination of choice from an environmental perspective, that is only part of the puzzle.

Why is ESG important?

Demonstrated commitment to ESG standards is particularly crucial for industries like solar PV, which is the fastest-growing energy technology in the world, and offers a rapid solution to decarbonise and protect citizens and businesses from volatile energy prices.

What does ESG stand for?

The European solar industry is unwavering in its commitment to responsible environmental, social, and governance (ESG) practices. Our core values are built upon the protection of the environment and respect for human rights, recognising that these principles are fundamental to sound governance of the solar sector.

What are ESG standards?

ESG standards are designed to evaluate a company's performance in three key areas: Human and Labour Rights. SSI members from manufacturing sites must commit to completing an ESG assessment of two sites within 12 months by an SSI-approved AB. The SSI Assurance Process is implemented at a site level.

How much CO2 does the UK generate from solar panels?

Currently the UK's solar capacity carbon footprint is relatively low estimated as 20-50 grams of CO2 per kWh. It is predicted that by 2050 the UK could generate up to 800,000 tonnes of solar panel waste. This highlights the need for a robust recycling infrastructure.

The Chief Justice of the British Indian Ocean Territory (BIOT) has today ruled both that there is a common law right to legal aid in Diego Garcia and that certain provisions of ...

JinkoSolar has been recognized for its outstanding practices and achievements in carbon target validation and production of N-type Neo Green series modules at "zero-carbon factories" by inclusion ...
