

Fiji green camel solar

Who supports the Fiji solar project?

IFC has been supported by the governments of Australia and New Zealand through the Fiji Partnership and the Danish Government to carry out this solar project in Fiji.

What is Fiji's energy sector like?

Fiji's energy sector is highly dependent on fossil fuels, with fossil fuel imports accounting for 25-30% of all imports, leaving it exposed to oil price increases and volatility. Electricity access is 82% in rural areas and 96% in urban areas. However, in rural areas access to electricity is often limited to a few hours per day.

Does Fiji have a stable electricity supply?

Fiji produces over half of its electricity from hydropower. However, the volatility of annual rainfall in recent years, along with an increase in climate variability, has compounded problems caused by the lack of a stable electricity supply.

It will do this by financing a 4 MW solar agrophotovoltaic (APV) system and 5MW battery energy storage system (BESS) in Ovalau, Fiji's sixth largest island. It will develop solar power generation simultaneously with battery storage and, as a co-benefit, boost local agricultural production.

Fiji is embarking on a project to bring solar power to its remote islands. It starts by creating tenders for mini-grid construction, and employing tools to customize energy systems for each community ensuring each ...

Fiji's first ever Agro Photovoltaic project to make Ovalau 50 percent renewable energy efficient and involve women and youth in learning climate-smart farming techniques

Fiji is embarking on a project to bring solar power to its remote islands. It starts by creating tenders for mini-grid construction, and employing tools to customize energy systems for each community ensuring each community's needs are met. The project is building bridges with local communities and has received very positive feedback.

Suva, Fiji, October 21, 2020- A landmark agreement between Energy Fiji Limited (EFL) and IFC to deliver the largest solar project of its kind in the Pacific to date has been hailed a transformative step that will take the island nation closer to its goal of sourcing 100 percent of its energy needs from renewable sources.

Discover how a \$10 million solar farm project in Fiji is not only set to harness renewable energy but also support local agriculture. With adjustments made from community ...

The 1.55 MW solar PV project is the first of two phases required to achieve the target of 100% electricity generation from renewables in Taveuni. The current phase 1 will reach 65% and will be completed by 2020. GGGI will continue to support the Government of Fiji beyond this project to achieve the 100% target by 2030.
